

LEONG ZHI CONG

Software Engineer | Full-Stack Web & Mobile Developer

☎ 60+ 11-56293151 ✉ bossleongzhicong@gmail.com 📍 Kuchai, Kuala Lumpur, 58200

ABOUT ME

Computer Science graduate with hands-on experience in full-stack web development, Android mobile application development, and machine learning. Proficient in Java, JavaScript, PHP, Python, Firebase, MySQL, and modern web technologies. Experienced in developing responsive web applications, Android apps, and AI-based systems through academic and internship projects. Passionate about building scalable software, writing clean code, and continuously learning new technologies.

EDUCATION

UNIVERSITY TUNKU ABDUL RAHMAN KAMPAR | May 2021 - Oct 2025

Qualification : **Bachelor of Computer Science (Honours)**

Language: **English (Muet Band 3.5), Malay, Mandarin**

WORK EXPERIENCE

PUSAT MULTIMEDIA CORNER SDN BHD | 4th Nov 2024 - 8th Feb 2025

Web Assistant (Internship)

- Maintained and updated the company website.
 - Enhanced responsiveness using CSS.
 - Assisted with hardware installation and workstation setup.
 - Provided day-to-day IT support.
 - Collaborated with senior staff to improve usability.
-

SKILLS

- **Languages:** Java, Python, C++, JavaScript, PHP, SQL
 - **Frontend:** HTML5, CSS3, Responsive Web Design
 - **Backend:** PHP, Firebase, REST API (Basic)
 - **Mobile:** Android Studio, Firebase Authentication, Firestore
 - **Database:** MySQL, phpMyAdmin, Firebase
 - **Machine Learning:** OpenCV, TensorFlow, Keras, EfficientNet-B0, ResNet-50, KNN, SVM
 - **Tools:** Git, GitHub, VS Code, Android Studio, XAMPP
-

Academic Project

Mobile Development

- **Personalized Diet & Workout Planner Application Development (Final Year Project)**

Developed a fully functional mobile app providing personalized diet plans and workout routines based on user goals. Used Firebase for database management, including user authentication (login/signup) and real-time storage of user profile and preference data. The app include four fragments - **Diet Fragment**(for user to record every meal consumed within the period), **Workout Fragment** (includes exercise video for user to do), **Progress Fragment** (to keep track on the their progress in Statistics) and **User Fragment** (Edit User details)

- **Simple Quiz Game Application for Students**

Designed a lightweight quiz app for students to test knowledge across different topics. Implemented question scoring, answer validation, and a simple progress tracker.

Web Development

- **Interactive Recipe and Culinary Web Application**

Created an interactive web platform where users can browse, search, and share recipes. Used **XAMPP** (phpMyAdmin) to perform **CRUD** operations (**Create, Read, Update, Delete**) on recipe data tables. Built with **PHP, HTML, CSS**, and **JavaScript** for dynamic content display and responsive layout.

Machine Learning

- **Traffic Sign Recognition and Detection System**

Built a traffic sign recognition system using **OpenCV** and **C++**. Started with **image segmentation** by performing **canny edge, longest contour**, etc. to remove the background noise. After that, performed **color detection** and **shape classification** to detect signs. Used **KNN** and **SVM** classifiers to evaluate model performance, reporting **confusion matrix**, includes **accuracy** and **F1 scores** for three sign categories: **Warning, Guide**, and **Regulatory**.

- **Skin Cancer Risk Predicting System**

Developed a predictive model to assess skin cancer risk based on input data. Trained models using **EfficientNet B0** and **ResNet-50** architectures. Dataset obtained from **Kaggle**. Used **Gradio** as the user interface for easy interaction and risk prediction output.
